

NX10 Golf

josTtech

info@josTtech.ch

Vending machine for Golf products

The new vending machine **NX10** is equipped with **28** different ejection moduls for stackable products in a unified size. Due to the new ejection process the machine is extremely compact. More than half of the machine volume can be filled with products. In every situation you will find enough space to attach the **NX10** to a wall, close to the customer. Huge areas of free space allow eye catching advertising stickers or even a TFT display as an option. The **NX10** will increase impulse buying figures at your POS. After selecting the product the price appears in teh LCD and after paying the product is supplied.

Benefits

- + 24h operation at 7 days
- + Simple operation
Select product, present NFC CreditCard and take product after delivery
- + Compact for wall mounting close to the customer
- + Ejection of Golf products in a standard box
- + Indoor and protected outdoor use
- + Price setting and door lock control by OperatorCard
- + Vending reports online
