NX10 Midi Maps

Vending machine for press products

The new vending machine **NX10** is equipped with different ejection moduls (MapDrives) for maps, booklets, instructions, postcards etc. The maximal number of MapDrives depends on the choosen size of the housing and the size of the products. The **NX10** is extremely compact. In every situation you will find enough space to attach the machine to a wall, close to the customer. Huge areas of free space allow eye catching advertising stickers or even a TFT display as an option. The **NX10** will increase impulse buying figures at your POS. After selecting the product the price appears in the LCD and after paying the product is supplied.
